

On behalf of our entire dental team, I would like to welcome you to our office. We pride ourselves in making dental treatment a pleasant experience paying special attention to each and every patient's individual needs and circumstances. We realize that patients have a choice in their dental care provider and we make every effort to exceed our patients expectations. We accomplish this by getting to know you and your individual expectation of your dental practice and team.

Your first appointment will be for a complete oral examination. At this appointment I will do an oral cancer screening, comprehensive periodontal screening, examine your jaw joints, and obtain whatever records (x-rays, molds of your teeth, etc.) are necessary. This appointment will take a full hour and will enable me to do a complete diagnosis.

Once I have gathered all the vital information, I will study the findings and design a total treatment plan for the health of your mouth. A full explanation of the findings, necessary treatment and options will be discussed. Together we can decide what is the best route for you to take to obtain optimal dental health and keep it that way for the rest of your life.

Over the years my professional interests have become focused on comprehensive restorative dentistry. My basic rule of thumb is to treat your mouth as I would treat mine. I try to direct all treatment toward the goal of a mouth that is free of disease. fully and harmoniously restored with the most durable possible materials.

Because we know your time is valuable, we have enclosed a welcome packet so we can both be prepared for your visit. Please take a moment to fill out the entire health history and return it in the self addressed stamped envelope.

If you have any questions or concerns, please call our office and speak to one of our team members. We look forward to meeting you and thank you for allowing us to provide you with quality individual dental care.

Sincerely,
